Maxi Span

Harford's Maxi Span design is clearly New Zealand's most popular greenhouse. Not surprising. It's design and engineering excellence have been proven through the worst of New Zealand's weather. Through storm and cyclone, the Harford Maxi Span design has come through unscathed. Computer analysed design and proven engineering will withstand winds up to 40m/sec without structural damage.

The Maxi Span is also engineered to support 15 kg/m² crop loads-which means no extra posts and lower costs for you. Full ventilation options are available too, for lower humidity, less disease risk and better all-round ventilation.

The unique modular design of the Maxi Span will fit any size or site requirement easily, simply and economically. Standard bays 3m long and 6m or 9m wide are suitable for single or multi-bay installations. Steep pitch roof and galvanised walk-through gutters with leg heights of up to 4m offer the option for more crop area and better air circulation for dense foliage, meaning no condensation drip, exceptional water drainage, no leaks and easy servicing.

The Maxi Span's all steel galvanised frame is finished in corrosion resistant white powdercoated finish for less shade from posts, longer cover life and smart appearance. Cliplock plastic cover fasteners means fast, easy erection and reusable inserts.

Harford Greenhouses use only the very best covers: Wide film 150mu or 200mu gives you inflated twin-skin films for greater heat retention, higher light levels and thermal efficiency.

Choose from automatic or manual, single or double gull-wing ridge ventilation, siderollers or gable end vents. Erecting the Maxi Span is easy: Harford's sleeve connections mean simple on-site construction and our own experienced building team ensures a fast, precise, low cost service anywhere in New Zealand.

MAXI SPAN OPTIONS

| | |
|----------------|---|
| SIZE | Truss span 9 metres. Single or gutter connected multi-bay. Length modules: 3.00m. |
| TRUSS PROFILE | 27° roof pitch. Galvanised steel RHS legs. White powdercoated finish. |
| COVERS | 150 or 200mu greenhouse films. 45 month warranty against UV breakdown. Inflated twin skin - fan supplied. |
| PLASTIC FIXING | Harford Cliplock, two piece aluminium fastening system. Reusable insert. Buried plastic sides. |
| VENTILATION | Single gullwing ridge: 1.75 metres wide. Double gullwing ridge: 3.5 metres wide. Sideroller full side or half side. Gable end vents if required. |
| AUTOMATION | Single or three phase gearmotors. Temperature, wind, humidity, boiler and rain control. Fully computerised systems available - Harford Ecos. |
| DOORS | One, two or three metre openings at any location. |
